

# MOTO X LIFT

**MUCH IMITATED, NEVER EQUALED**

## GRIEKSPoor QUALITY

The foot-operated Moto X Lift has been specially developed for motorcycles. It makes it possible to perform work at standing height and reduces the need to exert oneself.

The Moto X Lift is a hydraulic lift that works according to the scissor lift principle. Its sophisticated lift and hitch system ensures that motorcycles are automatically and safely secured by their foot pegs as they are lifted. The rubber work platform is oil and petrol resistant.

The Moto X Lift is an extremely durable tool and is a purchase that will grace your garage or motorcycle department for dozens of years, enabling you to easily and safely work on your bike.

## FEATURES

- Measurements (l x w x h): 50 x 44 x 40 cm
- Weight without load: Light 23 kilos / Heavy 32 kilos
- Working height: 40 - 92 cm
- Maximum load: Light 110 kilos / Heavy 130 kilos
- Operation: foot lever operated
